

## 72MHz Site Survey Request Form

Information provided is required to determine optimal system coverage. Failure to provide complete and accurate information may affect coverage results and total cost.

Submit form and correspondence to: [siteevaluation@primexinc.com](mailto:siteevaluation@primexinc.com)

### System installation location

Facility Name	
Facility Address	

### Facility floorplans/maps

Primex must receive a building floorplan/map that identifies the below information.

Electronic file formats: PDF, TIFF, AutoCAD DWG, or JPEG.

- IDF/MDF/LAN rooms
- Transmitter(s) installation location
- Lowest basement level for planned clock/infoboard installation locations
- Rooftop antennas currently used to receive TV channel 4 or 5
- Rooftop antennas used to receive any other frequencies

Describe any major elevation changes, 25 feet (8 m), between buildings
--

If floorplans/maps are not available, provide the following information.

Healthcare facility: total area in square feet	
School campus facility: total area in sq. ft., mi, m or km	
Name of building located furthest away from Transmitter	
Any buildings with levels below ground level receiving clocks/infoboards	
Any buildings with levels below ground level receiving clocks/infoboards	
Lowest basement level receiving clocks/infoboards	
Rooftop antennas currently used to receive TV channel 4 or 5	
Rooftop antennas used to receive any other frequencies
